

ATTREZZO PER BATTERE CATENE (60-100MM)
EQUIPMENT FOR HAMMERING CHAINS (60-100MM)

ATTREZZO PER BATTERE CATENE (60-100MM)

USO CONSIGLIATO

Questo attrezzo viene utilizzato esclusivamente per battere catene lineari, cambiando gli inserti possiamo imprimere svariate sezioni alle catene da lavorare (esempio: mezzatonda, ovale, ovale "sagomata"). L'attrezzo per battere può essere anche utilizzato per eliminare le elicature sulle catene realizzate, quindi inserendo una coppia di eliche specifiche, andremo a calibrare la catena in modo lineare.

EQUIPMENT FOR HAMMERING CHAINS (60-100MM)

RECOMMENDED USE

This tool is used exclusively to beat linear chains; by changing the inserts we can give various sections to the chains to be worked (example: half-round, oval, "shaped" oval). The beating tool can also be used to eliminate the helixes on the chains created, therefore by inserting a pair of specific helixes, we will calibrate the chain in a linear way.

DATI TECNICI/TECHNICAL DATA

Dimensioni/Dimensions	10 cm x 10 cm x 14 cm (H)
Peso a vuoto/Load less weight	3 kg
Materiale/Material	k720
